**CLAIMS**

What is claimed is:

**1—56. (canceled.)**

**57. A computer-implemented method for automatically creating linked computer context, comprising:**

- a) removing user-selected content from a parent context;**
- b) creating and automatically naming a new context comprising said user-selected content; and**
- c) inserting a reference to said new context in said parent context, wherein said reference comprises a uniquely identifying function of a name of said new context,**

**wherein said reference is inserted in the place of said removed user-selected content, and wherein the method is used for purposes comprising web authoring, hypertext editing, and weblogging.**

**58. The method of claim 57, wherein said parent context and said new context are selected from the group consisting of files, web pages, windows, frames, buffers, and sticky notes; or wherein said name comprises a uniquely identifying function of a timestamp at which said new context creation occurs; or wherein said reference is a hyperlink.**

**59. (canceled.)**
